

ECO Data System

The ECO Data System is designed to help the driver maximize fuel economy by providing vehicle data and driving tips. The ECO Data System can be accessed via the 'Extra Features' menu on the Touch Screen. If driving conditions permit, then selecting 'ECO' (using the soft key) will also help to achieve a more economical driving performance.

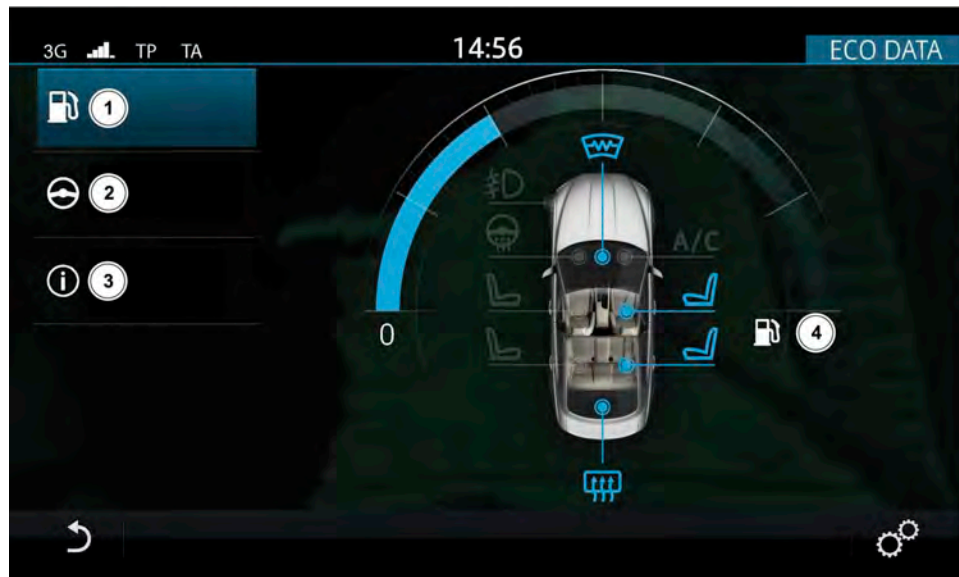

Item	Description
1	ECO Data Soft Key

When selected, the ECO Data System displays the following options:

- Impact on fuel – displays the impact that electrical loads are having on fuel economy
- Driving style – displays feedback and scoring to rate driving efficiency
- Advanced trip – displays detailed historic trip computer information
- ECO tips – displays hints and tips on how to improve efficiency
