

Activity - LED Headlamp Delegate-Induced Fault

QUESTION 1

Note any changes in lamp operation with LIN 5 shorted to ground.

QUESTION 2

Note any warning messages.

QUESTION 3

What DTCs were stored?

QUESTION 4

What part of the LED lamp is controlled by LIN 5?

QUESTION 5

Using the Six Step Process, outline a diagnostic procedure for locating a fault with the headlamps.

Activity – Gesture Tailgate Control Operation and Limitations

INSTRUCTION

OBJECTIVE:

- Using your Student Guide, number the Steps on the poster in the correct sequence.
- Within your group, discuss what actions could potentially cause a false Gesture Tailgate Control function. Use a training vehicle to confirm your suggestions.

TIME: 15 minutes

INSTRUCTION

Using the training vehicle and/or Training App, highlight on the vehicle image on the poster the areas of the bumper where the Gesture Tailgate will and will not respond to a kick gesture.
